

# CHEMCATS

## Online and on the web from CAS

### CHEMCATS® contains more than:

- 1,100 catalogs accessible through SciFinder® and STN®
- 37 million chemical catalog entries
- 29 million screening compound entries from 43 screening libraries
- 10 million unique chemicals

### An essential source of commercially available chemicals and their worldwide suppliers!

Leafing through printed catalogs to find commercial products is a thing of the past. Those who need to order chemicals now are turning to CHEMCATS, the online database from CAS, a division of the American Chemical Society. CHEMCATS is the fast, efficient route to up-to-date information on commercially available chemical products.

CHEMCATS provides rapid access to the catalogs and chemical libraries for a growing number of the best

known, as well as hard to find, chemical suppliers worldwide.

CHEMCATS is available via the CAS products and services used every day by thousands of scientists in the chemical industry and other research laboratories.

Users can find the information they need by simply entering a chemical name, CAS Registry Number®, supplier, or even a structure diagram.

### What CHEMCATS can do for you

By providing your catalog information in CHEMCATS, you can reach those who order chemicals, including thousands of scientific researchers and purchasing agents worldwide. These people search CAS databases every day to identify chemicals of interest.

With your participation in CHEMCATS, this large international audience will be presented with your catalog records and ordering information, whenever your products match the chemicals they locate in their search. **There is no fee for your participation.**

To receive more information about becoming a CHEMCATS catalog supplier, with no obligation:

**E-mail:** [chemcats@cas.org](mailto:chemcats@cas.org)
