STN Database Summary Sheet

BIBLIODATA is a multidisciplinary bibliographic database based on the German National Bibliography of Die Deutsche Bibliothek. Die Deutsche Bibliothek is the central archival library and national bibliographic center for the Federal Republic of Germany with locations in Frankfurt am Main (Deutsche Bibliothek) and Leipzig (Deutsche Buecherei). Die Deutsche Bibliothek is responsible for the collection, preservation, and bibliographic indexing of all printed and electronic publications in Germany since 1913; all German-language publications issued abroad since 1913; all translations into other languages issued abroad of German-language publications since 1913; all foreign-language publications about Germany (Germanica) issued abroad since 1913. BIBLIODATA covers all mentioned publications 1945 to present.

Citations are in German with titles in the original language.

The records contain bibliographic information and, for books from publishing houses, additional indexing information.

Subject Coverage

The database is multidisciplinary. Parts of the German National Bibliography in BIBLIODATA are:

- A: Monographs and periodicals from the publishers' book trade
- B: Monographs and periodicals from outside the publishers' book trade
- C: Maps
- G: Germanica and Translations
- H: University publications, i.e., theses and postdoctoral publications
- N: Cataloguing-in-Publication (replaced if cited in Part A or B, i.e., Pre-publication notifications for monographs and periodicals)
