

STN® AnaVist™, Version 2.0 – Using Project Sharing

A division of the American Chemical Society

Project sharing leverages your intellectual investment by allowing your colleagues to profit from and interact with your work

- **Projects created in Version 2.0 (using the .shx format) can be shared with colleagues in your organization (also applies to .avx files from Version 1.1)**
- **Sharing creates a copy of your existing project, including all annotations, bar charts, matrix charts and the Research Landscape**
- **Select the “Save Copy of ...” command via the File menu for any open project, or right-click on a project name and select “Save a Copy ...”**
- **Recipients may customize their copy of a shared project**
- **No additional visualization costs for project sharing – project storage fees and document display charges apply**

A division of the American Chemical Society

It's easy to save a project to share with a colleague or researcher in your organization

Alternatively, select the "Save Copy of ..." command via the File menu for any open project.

Open an STN AnaVist 2.0 Project Copy via the File menu – Open Project Copy

Open a shared project with full STN ID or STN Login ID for Shared Projects.

ACS
A division of the American Chemical Society

Project sharing creates an identical copy, including all annotations, charts and the Research Landscape

Recipients may further customize shared projects.

ACS
A division of the American Chemical Society

STN Login IDs for Shared Projects allow non-STN users access to visualization projects

- STN Login IDs for Shared Projects allow individuals in your organization to gain access to STN AnaVist shared projects
- Must be requested by a full-access STN login ID holder
- To request these login IDs, complete the STN Login ID for Shared Projects Request Form:

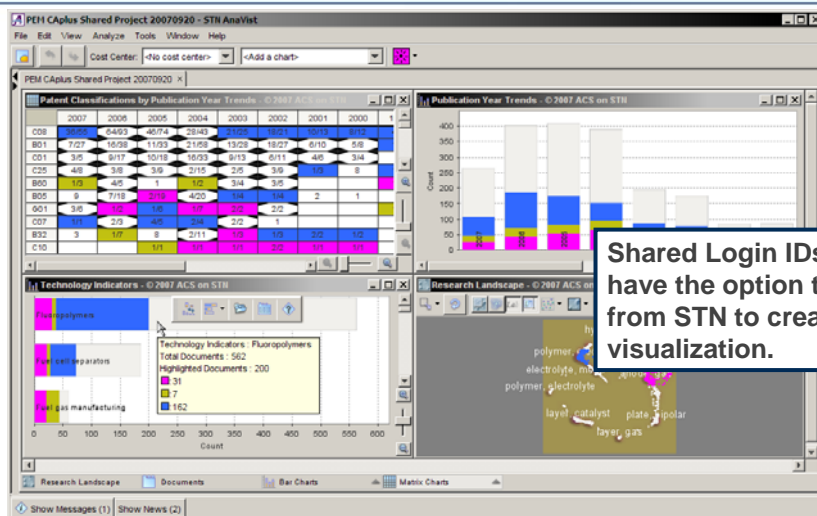

<http://www.cas.org/products/anavist/howtolicense.html>

- Any fees incurred are billed to the full-access STN account with which they are associated

A division of the American Chemical Society

STN Login IDs for Shared Projects, Open an STN AnaVist Project Copy via the File menu is the only option

Shared Login IDs do not have the option to Import from STN to create a new visualization.

A division of the American Chemical Society

Shared Login IDs cannot create new visualizations or utilize the Download CPlus Documents feature

Comparison of STN AnaVist 2.0 features between Shared Login IDs and STN Login IDs:

- Displaying, printing and saving answers
 - Edit Terms function
 - Group Terms reclustering
 - Creating new charts
 - Subset visualizations
-
- Starting new visualizations
 - Download CPlus Documents feature
