

STN is operated in North America
by Chemical Abstracts Service.

STN Database Summary Sheet

The **LBIBLIO** file is a training database intended for learning to use the BIBLIODATA file. The database contains a static number of records from all kinds of documents announced in BIBLIODATA from 1975 to 1987. The source of BIBLIODATA is the German National Bibliography. The German Library in Frankfurt has the function of archiving all German publications and is the bibliographic reference center for the Federal Republic of Germany. The BIBLIODATA database contains all German publications such as books (including theses, proceedings, reports, etc.), journals (but not the single articles of a journal), and maps. The file is in German although some titles can be in other languages.

Subject Coverage

The database is multidisciplinary. The classification consists of 36 scopes from 1972 to 1981. Since 1982 a 65-classification code scheme has been used.

- | | | | |
|-----------------------|-------------------------|----------------------|---------------------|
| – Agriculture | – Electronics | – Materials Science | – Physics |
| – Architecture | – Energy | – Mathematics | – Political Science |
| – Astronomy | – Engineering | – Medicine | – Polymers |
| – Biology | – Environmental Science | – Metallurgy | – Psychology |
| – Building Technology | – Geology | – Military Science | – Social Sciences |
| – Chemistry | – Geosciences | – Mining Engineering | – Statistics |
| – Computers | – Health | – Nuclear Science | |
| – Construction | – Life Sciences | – Pharmacology | |
| – Economics | – Maps | – Photography | |

Sources

All publications collected by the German Library in Frankfurt from the Federal Republic of Germany, publication from the German Democratic Republic, Austria, and the German speaking part of Switzerland, and publication in the German language from other countries.

File Data

- 40,000 records
- File is not updated

User Aids

- BIBLIODATA Database Description
- References of Index Terms (online)
- References of Corporate Entries (online)
- Online-Helps (HELP DIRECTORY lists all help messages available)

| Accession Number | | use D ACC | AN |

(1) Proximity search with (W), (nW), (nA), and (L) operators possible.

(2) /AS (Author Statement) can be used as synonym.

(3) For list of country names and ISO codes, use EXPAND command.

(4) For list of document types and codes, use EXPAND command.

(5) Since announcing year 1986 a special rule, called RSWK, is used. The result is an indexing chain which is DISPLAYed in the field IT; the controlled terms of this chain are SEARCHable with (W) operator in the Basic Index.

(6) All expression with the German 'umlaut' are inverted twice, the decomposed form, e.g., oe and additionally signed with an asterisk (S BOELL/AU and S B*OELL/AU). For DISPLAY, the decomposed form with asterisk is shown.

(7) SEARCH of controlled terms and code of controlled terms belonging together, see field IT.

(8) SEARCH of a place (/CT) together with the geographical code of the country, see field IT.

DISPLAY and PRINT Formats

All DISPLAY fields can be used as DISPLAY or PRINT formats. For DISPLAY of references CSR and CTR all predefined formats can be used.

| Format | Content | Examples |
|---------------------------------------|--|---|
| BIB IND ALL TRIAL LIB (1) | AN, TI, AU, CS, AS, DI, NR, PB, SO, TS, CR, DT, DN (BIB is default) CC, CT, CTC, GC BIB, CY, IND AN, TI, AU, CS, PB, CC, CT AN, LIB format, IT, CR, AE, DN | D BIB L5 D L8 1 10 IND D 10, 12, 15 ALL D LIB CC |

(1) The format LIB is a library specific format without field codes as required for the ISBD format and similar to the format in the printed version.

SELECT, ANALYZE, and SORT Fields

The SELECT command is used to create E-numbers or an L-number containing terms taken from the specified field in an answer set.

The ANALYZE command is used to create an L-number containing terms taken from the specified field in an answer set.

The SORT command is used to rearrange the search results in either alphabetic or numeric order of the specified field(s).

| Field Name | Field Code | ANALYZE/ SELECT | SORT |
|--------------------------------------|------------|--------------------|------|
