- (1)** CAS Registry Numbers and Enzyme Codes can also be searched in this field. A /CN Thesaurus is available online. Starting on November 19, 2000, a new relationship, +XUSE, has been defined for EXPAND and SEARCH in the /CN field. XUSE includes both USE and UF terms. When you EXPAND in the /CN field, a message is displayed if additional terms are available by using the +XUSE relationship. If there are additional USE or UF terms available for a search in the /CN field, they are automatically included in the search.
- (2)** MeSH Tree Numbers are also searched in this field. (L) proximity is available with Qualifiers. Postings for MeSH Headings do not include narrower terms, while MeSH Tree Numbers do include all narrower levels. /CT and /MN Thesauri are available online. Starting on November 19, 2000, a new relationship, +XUSE, has been defined for EXPAND and SEARCH in the /CT field. XUSE includes both USE and UF terms. When you EXPAND in the /CT field, a message is displayed if additional terms are available by using the +XUSE relationship. If there are additional USE or UF terms available for a search in the /CT field, they are automatically included in the search.
- (3)** This field is not available for records in the OLDMEDLINE file segment.
- (4)** Search with implied (S) proximity is available in this field.
- (5)** Both STN standard document types and original NLM publication types (displayed in parenthesis) are searchable separately as bound phrases.
- (6)** Numeric search field that may be searched using numeric operators or ranges.
- (7)** The presence of AB, CN, CS, EML, NA, OS, RN, ST fields can be searched in the /FA field; as well as the sections of the structured abstract: Background, Conclusions, Methods, Objective, and Results.
- (8)** Enter HELP FS at an arrow prompt for definitions of the FS codes.
- (9)** Data indexed in this field only until 1996.

- (10) Subject of biographical or related article.
 (11) Enter HELP OS for information on the content of this field.
 (12) The EXPAND command is not available for use in this field.
 (13) When author's name entered with multiple initials, automatically also searches the author's name with a single initial.

Limiting Search Codes

Only an answer set created in MEDLINE may be limited. L-number answer sets created by as search in the /ED or /UP field may also be limited.

Search Field Name	Search Code	Search Examples
Animal Subject (1) English-Language Records Female Subject (1) Human Subject (1) Major Descriptor (1) Male Subject (1)	/ANIMAL /ENG /FEMALE /HUMAN /MAJ /MALE	S L4/ANIMAL S L1/MAJ,ENG (2,3) S L3/FEMALE S L1/HUMAN S L1/MAJ S L2/MALE

- (1) Not available in OLDMEDLINE file segment.
 (2) Field codes may be abbreviated to the first three letters.
 (3) Answer sets may be limited to more than one area.

Chemical Name (/CN) Thesaurus

All Relationship Codes can be used with both the SEARCH and EXPAND command in the Chemical Name (/CN) thesaurus.

The /CN thesaurus does not apply to the OLDMEDLINE file segment.

Code	Content	Examples
ALL	All associated terms (SELF, CN, RN, EC, UF, USE, RR, HM, PA, INDX, NOTE, PNTE, RE)	E CHAETOGLOBOSINS+ALL/CN E 86414-29-1+ALL/CN
AUTO (1)	Automatic Relationship Code (SELF, USE)	E BROMOACETIC ACID+AUTO/CN
HM	Heading Mapped to (SELF, CN, RN, EC, RR, HM)	E NEOSPORIN+HM/CN
NOTE	Notes associated with the term (SELF, CN, RN, EC, RR, INDX, PA, NOTE, PNTE, RE)	E SERICYSTATIN+NOTE/CN E EC 2.4.1.119+NOTE/CN
PFT	Preferred and Forbidden Terms (SELF, CN, RN, EC, RR, UF, USE)	E COMBRETASTATIN+PFT/CN
RN	CAS Registry Number associated with the name or name associated with a CAS Registry Number (SELF, CN, RN, EC)	S ARGINYLPROLINE+RN/CN E 2418-69-1+RN/CN
RR	Associated CAS Registry Numbers (SELF, CN, RN, EC, RR)	E FLUVALINATE+RR/CN
XUSE	USE and UF terms from the current MeSH	E 6-CHRYSENYLAMINE+XUSE/CN S 6-CHRYSENAMINE+XUSE/CN

- (1) AUTOMATIC relationship is SET OFF. In case of SET REL ON, the result of EXPAND without any relationship code is the same as described for AUTO.

Field Descriptors for the /CN Thesaurus

Code	Description
-->	Self
CN	Chemical Name and Enzyme Name
EC	Enzyme Commission Numbers
HM	Heading Mapped To
INDX	Indexer Note
NOTE	Scope Note
PA	Pharmacological Action
PNTE	Previous Indexing Note
RE	Reference
RN	CAS Registry Number
RR	Related Registry Numbers
UF	Used For
USE	Use

Controlled Term (/CT) Thesaurus

All Relationship Codes can be used with both the SEARCH and EXPAND command in the Controlled Term (/CT) thesaurus.

The /CT thesaurus contains the current Controlled Terms. MeSH Tree Numbers are searchable terms in the /CT thesaurus.

The /CT and /MN Thesauri have the same EXPAND abilities except when expanding MeSH Tree Numbers. The /CT Thesaurus will expand the same Tree Number hierarchy, while the /MN Thesaurus will expand the MeSH terms corresponding to the various MeSH Tree Numbers.

The /CT thesaurus does not apply to the OLDMEDLINE file segment.

Code	Content	Examples
ALL	All associated terms (BT, SELF, MN, DC, NOTE, INDX, ENTC, AQ, PNTE, HNTE, MHTH, BXTH, PA, UF, USE, QUSE, NT, QLF, QA, QCAT, QNOTE, QINDX, QHNTE, QONTE, QUF, RT)	E PEPTIC ULCER+ALL/CT E C6.405.608+ALL/CT
AUTO (1)	Automatic Relationship Code (Preferred Terms and Qualifiers) (SELF, USE, QUSE)	E NASAL SINUSES+AUTO/CT E ADV EFF+AUTO/CT

MeSH Tree Number (/MN) Thesaurus

In the MeSH Tree Number (/MN) Thesaurus, all Relationship Codes can be used only with the EXPAND command.

The /MN Thesaurus does not have any postings. When searching, it is necessary to edit the field code to /CT.

The /CT and /MN Thesauri have the same EXPAND abilities except when expanding MeSH Tree Numbers. The /CT Thesaurus will expand the same Tree Number hierarchy, while the /MN Thesaurus will expand the MeSH terms corresponding to the various MeSH Tree Numbers.

The /MN thesaurus does not apply to the OLDMEDLINE file segment.

Code	Content	Examples
ALL	All associated terms (BT, SELF, MN, MH, EC, DC, NOTE, INDX, ENTC, AQ, PNTE, HNTE, ONTE, MHTH, BXTH, PA, UF, USE, QUSE, NT, QLF, QA, QCAT, QNOTE, QINDX, QHNTE, QONTE, QUF, RT)	E GRANULOMA+ALL/MN E C23.550.382+ALL/MN

(1) No online display fee for this format.

(2) Custom display only.

(3) SCAN must be specified on the command line, i.e., D SCAN or DISPLAY SCAN.

Displaying MEDLINE documents for cited references

Enter the following in the DISPLAY command: L-number for the answer set; answer number (only one may be specified); RAN.MEDLINE(x-y) where (x-y) is the cited reference number, numbers, or range of numbers; and the display format for the document to display, e.g., BIB ABS. For example, to display MEDLINE records for the cited references 1 and 2 from answer 2 in the answer set L5, enter the following:

=> D L5 2 RAN.MEDLINE(1-2) BIB ABS

SELECT, ANALYZE, and SORT Fields

The SELECT command is used to create E-numbers containing terms taken from the specified field in an answer set.

The ANALYZE command is used to create an L-number containing terms taken from the specified field in an answer set.

The SORT command is used to rearrange the search results in either alphabetic or numeric order of the specified field(s).

ABSTRACT:

BACKGROUND: Aspirin is widely used to modify the risk of recurrent vascular events. It is, however, associated with increased upper gastrointestinal bleeding risk. The influence of *Helicobacter pylori* on this risk is uncertain.

AIM: To determine the influence of *H. pylori* on upper gastrointestinal bleeding risk in patients taking aspirin.

METHODS: MEDLINE and EMBASE databases were searched. All studies providing data regarding *H. pylori* infection in adults taking aspirin and presenting with upper gastrointestinal bleeding were included.

RESULTS: A total of 13 studies that included 1 case-control, 10 cohort studies and 2 randomized-controlled trials (RCTs) were analysed. The case-control study (n = 245) determined *H. pylori* to be a significant independent risk factor for upper gastrointestinal bleeding. The cohort studies were heterogeneous, varying in inclusion criteria, doses and duration of aspirin used, mode of *H. pylori* testing and causative GI pathology considered. Comprising 5465 patients, *H. pylori* infection was tested for in 163 (0.03%) aspirin users with upper gastrointestinal bleeding. The RCTs yielded no significant results.

CONCLUSIONS: The current data are not sufficient to allow meta-analyses. The widely held belief that *H. pylori* is a risk factor for upper gastrointestinal bleeding in regular aspirin users is not supported by the very limited evidence available.

ABSTRACT:

Competence can be defined as having the requisite knowledge, skills, judgement, and experience to undertake a role or task. This article--part ten and the last in the series--discusses competency and why it is important for children's nurses to consider their skills and knowledge before taking on a procedure or role.
