

How To...

Find Commercial Sources

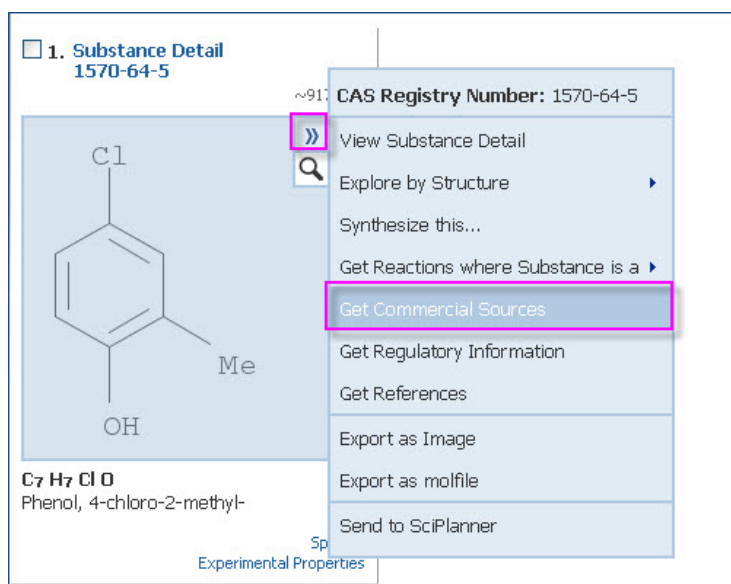

Use SciFinder® to find commercial source information for substances. You can designate a supplier as preferred or non-preferred, and in many cases link directly to pricing and availability information from a supplier.

1. To find commercial sources for a substance in your answer set, you can do one of the following:

- Click the **Commercial Sources** icon 
- Select **Commercial Sources** from the **Tools** menu
- **Get Commercial Sources** in the substance context menu

The screenshot shows the SciFinder interface for a substance. The top navigation bar includes 'Substances', 'Get References', 'Get Reactions', and 'Tools'. The 'Tools' dropdown menu is open, with 'Commercial Sources' highlighted in pink. Below the menu, the substance details for Phenol, 4-chloro-2-methyl- (CAS 1570-64-5) are displayed, including its chemical structure and molecular formula C₇H₇ClO. A small icon representing commercial sources is visible next to the substance name.

The screenshot shows the SciFinder interface for a substance. The substance details for Phenol, 4-chloro-2-methyl- (CAS 1570-64-5) are displayed, including its chemical structure and molecular formula C₇H₇ClO. A context menu is open over the substance, with 'Get Commercial Sources' highlighted in pink. Other menu items include 'View Substance Detail', 'Explore by Structure', 'Synthesize this...', 'Get Reactions where Substance is a', 'Get Regulatory Information', 'Get References', 'Export as Image', 'Export as molfile', and 'Send to SciPlanner'.

2. Click a company's name to see details such as contact information.
