

ChemZent®

Exclusive digital access to the earliest organized history of chemical literature.

As scientists work on solving the problems of today, there is much to be learned from the past. Information gaps in your collection can cause wasted time and missed opportunities.

ChemZent® makes historical insights accessible to anyone researching chemistry. ChemZent is the first and only indexed, searchable, English-language version of *Chemisches Zentralblatt*, the oldest journal of abstracts covering chemistry from 1830-1969.

This invaluable source of early chemical information is available as an add-on in SciFinder[®], the most comprehensive source of chemistry and related information, allowing you to **quickly and easily search a formerly print-bound collection.**

Digital & Searchable

Integrated with SciFinder[®]

Translated to English

Easy-to-use

How Does ChemZent® Help?

ChemZent® connects your institution to significant historical revelations allowing researchers to learn from the past to advance the future.

Enhance awareness of essential historic chemistry

Increase discoverability within older literature

Improve comprehensiveness of chemistry searches

Optimize shelf space with the digitization of 300 books

Avoid critical gaps in your collection
